CUTTING DATA

The INOCUT – cutting data “app” offers specific recommendations for cutting values depending on the contact cross-section, material and tool. The app guides you to the information you want using an intuitive selection process.

General Information about First Choice

Each tool is optimally tailored to the specific requirements of the materials to be machined, considering carbide, edge preparation, cutting geometry, chip evacuation, and high-performance coating.

Your **FIRST CHOICE**

Always to your advantage!

To make it easier for you to find your tailor-made tool, we have made a selection of our best products and have given them special recommendations.

Inovatools **PRODUCT LINE**

HP **High Performance - Tools**

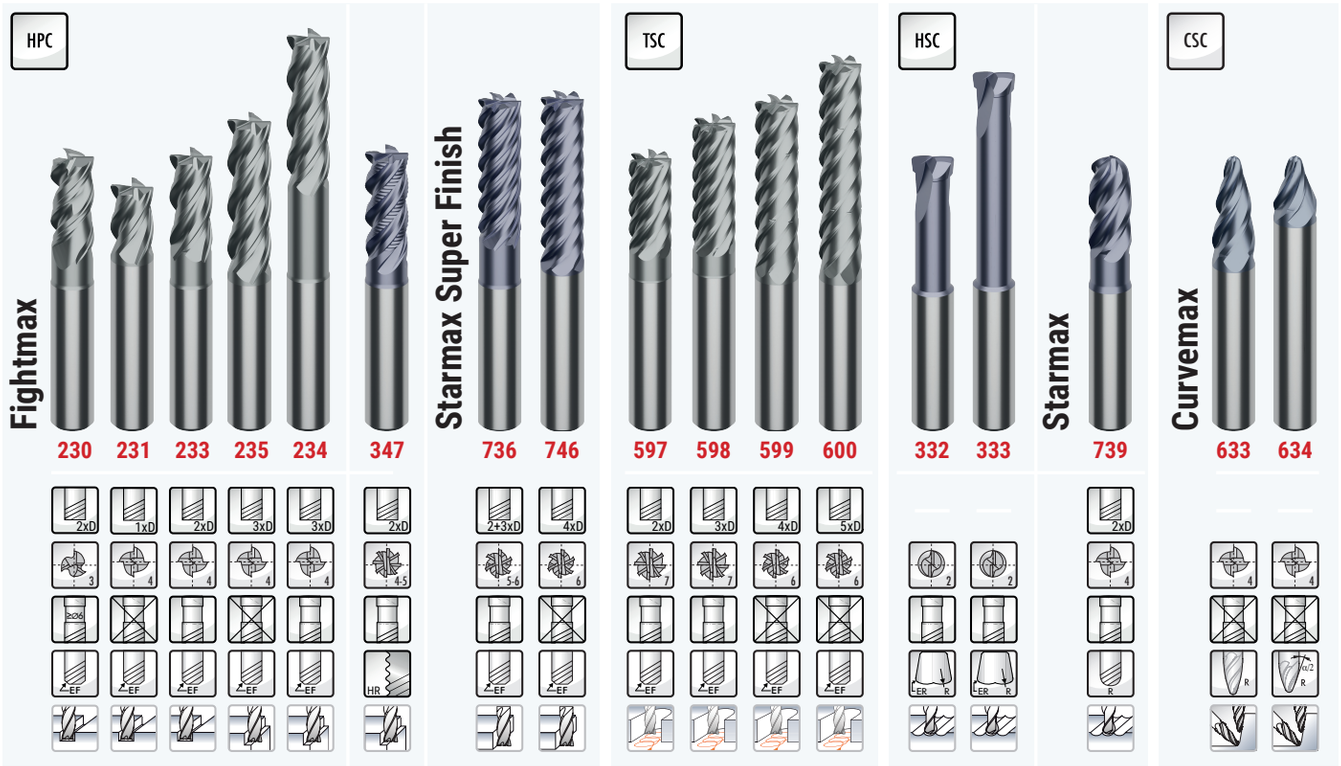

Top products for top results. Outstanding quality and dimensional accuracy in tight tolerance fields help you to meet the highest requirements. Entrust Inovatools with your machining challenge!

GP **General Purpose - Tools**

Quality tools at the best price-performance ratio. The alternative GP articles will provide you with optimal results in the most common areas of application.

Fightmax serie produced with solar power: solid carbide tools for sustainable precision.

P STEEL

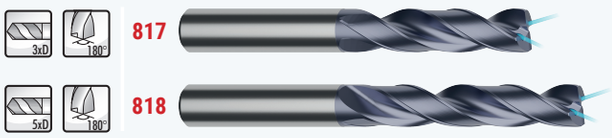

First Choice Steel Milling

The First Choice steel milling program includes HPC, TSC, HSC, and CSC areas, facilitating the selection of the most suitable tool for each application. The Fightmax series impresses with long service life due to optimized geometry and Varocon Plus coating, as well as a specially optimized forehead for ramping (ramp diving is recommended for Fightmax 1xD and 2xD).

Your **FIRST CHOICE**

P STEEL

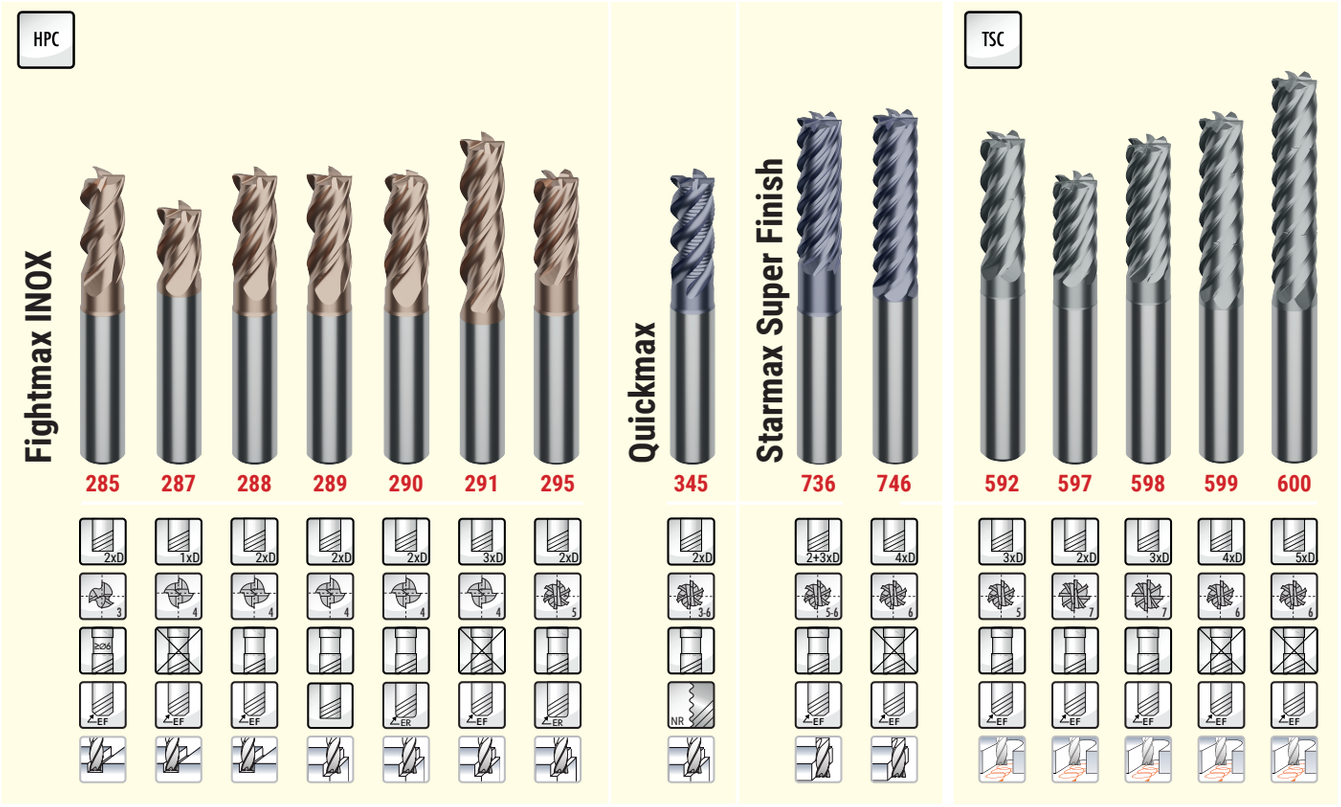

Deepmax

First Choice Steel Drilling

The steel drilling program covers applications from 3xD to 12xD. The flat drills are ideal for cross drilling and angled drilling. The Deepmax program, ranging from 15xD to 30xD, enables process-reliable deep hole drilling.

M STAINLESS STEEL

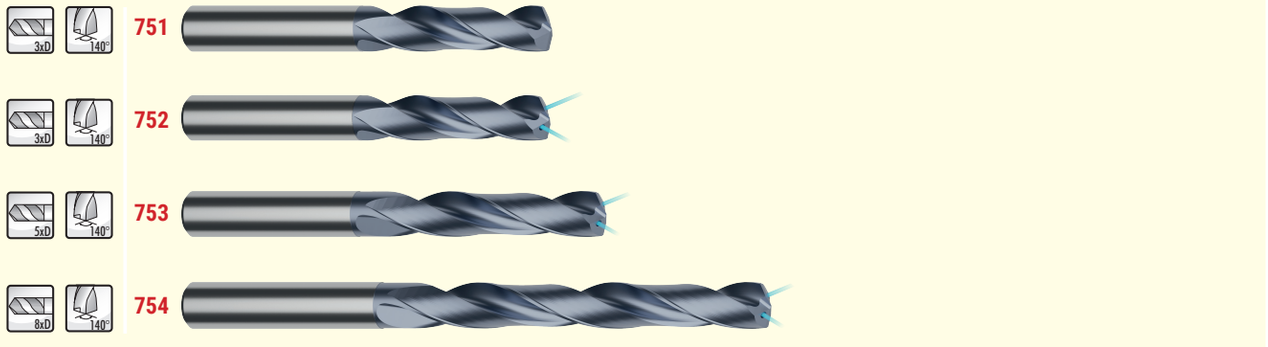

First Choice INOX Milling

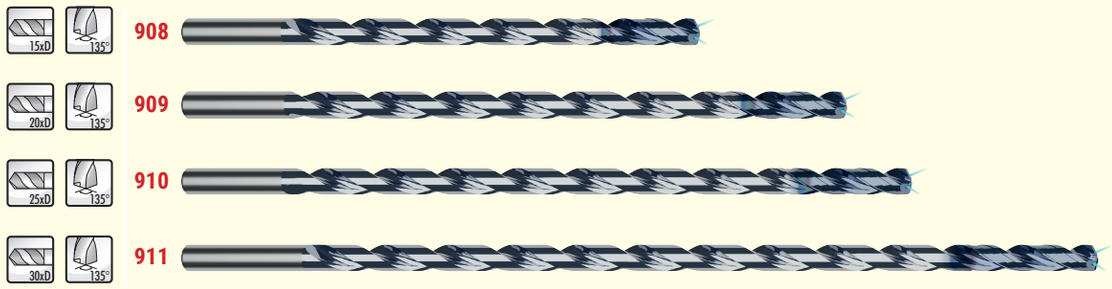

The First Choice INOX milling program covers the HPC and TSC areas. The Fightmax INOX series impresses with long service life due to optimized geometry and Duocon coating, as well as a specially optimized forehead for ramping (ramp diving is recommended for Fightmax INOX 1xD and 2xD with edge protection).

Your **FIRST CHOICE**

M STAINLESS STEEL

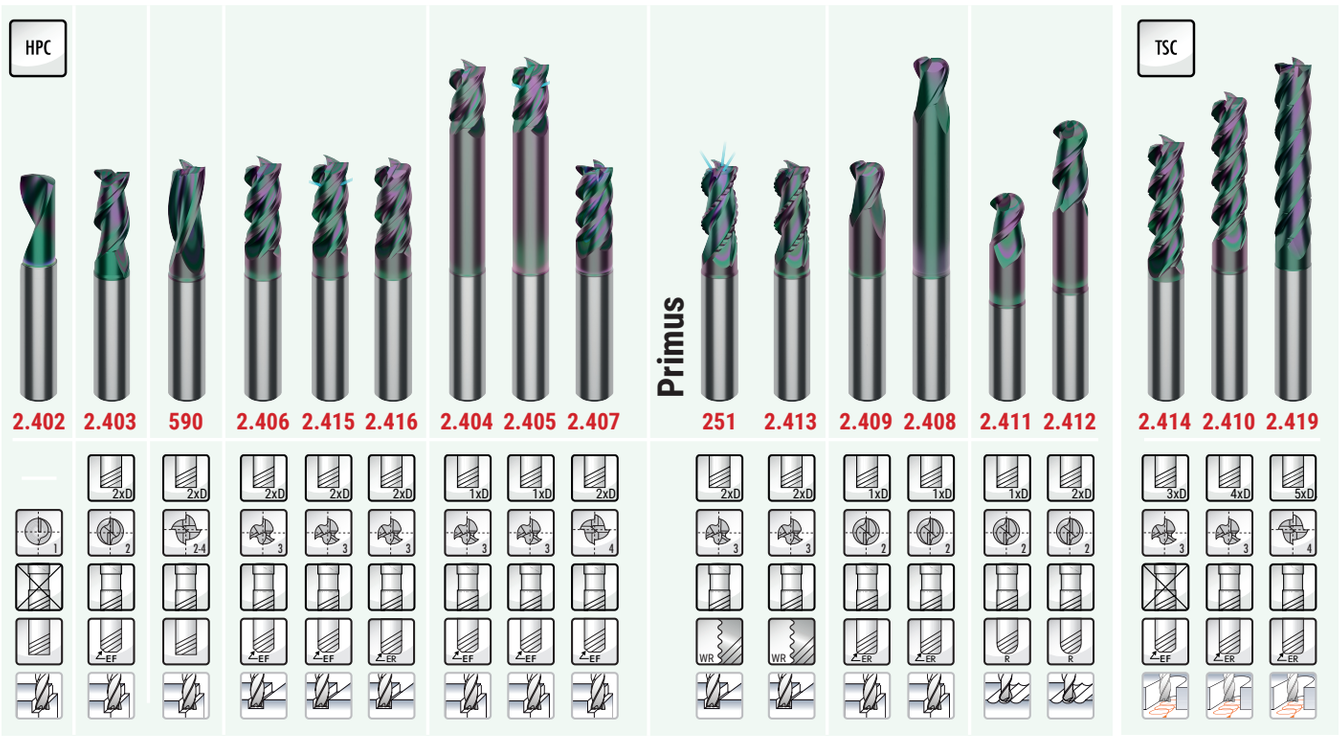

Deepmax

First Choice INOX Drilling

The INOX drilling program enables process-reliable drilling from 3xD to 8xD. The Deepmax program is also suitable for deep hole drilling in INOX.

N ALUMINIUM

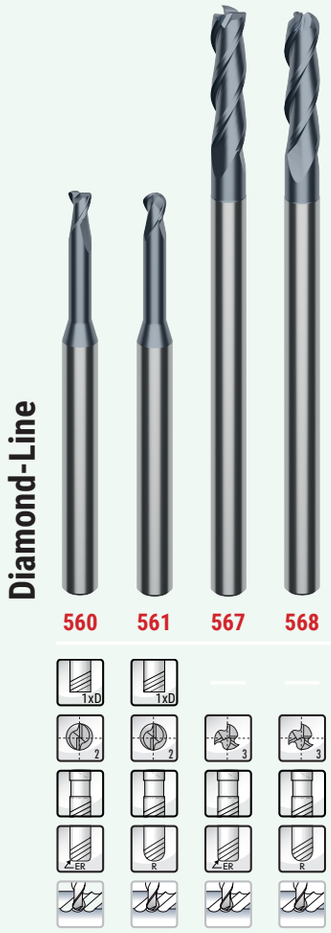

First Choice Aluminum

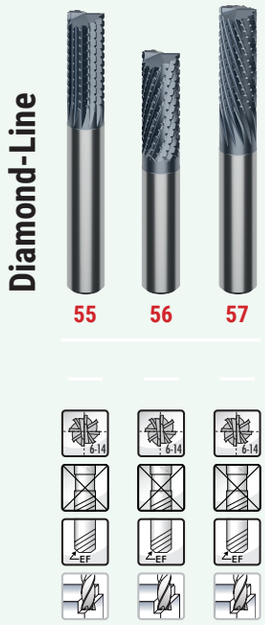

The aluminum program offers the perfect solution for almost every application in light metals. All tools are equipped with the ultra-hard thin-layer ta-C coating, which reduces material adhesion and allows for higher machining speeds.

Your **FIRST CHOICE**

N GRAPHIT

N GFK CFK

First Choice Graphite and GFRP/CFRP

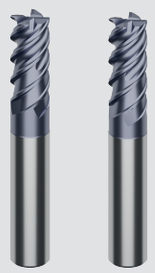

The Diamond-Line includes premium tools for machining graphite and composites like GFRP and CFRP. Diamond-coated carbide tools are the ideal solution for economically machining abrasive materials such as graphite and composites.

First Choice Titanium

The Fightmax Titan impresses with the highest precision and service life in the machining of difficult-to-cut titanium material.

SPECIAL SOLUTIONS / EXPRESS SERVICE

Do you need a special geometry or dimensions that are not available in any standard program? - Then you've come to the right place! With our expertise and many years of experience, tools can be designed specifically for your machining operations. This makes your production more flexible and efficient. You save time and money.
With individually designed special solutions you can achieve maximum performance for your machining project. Application specific coatings also offer you high wear resistance, sliding properties and extended service life.

What tools do we offer

Milling cutter / form cutter
Drills / form & step drills
Reaming and countersinking tools
Grooving tools

Suitable for machining strategies

Universal / HPC / TSC / HSC / CSC

REGRINDING SERVICE

Our experienced team brings your tools back up to date, saving you time and money. With a pick-up and delivery service and personal on-site support, we offer you first-class service. After determining the wear and tear, your tools are reground on the most modern CNC machines with optimal geometry. The tools are coated after individual pre- and post-treatment and, optionally, cutting edge preparation. This allows you to extend the service life of your tools many times over.

Which tools do we regrind

Core competence carbide, HSS / PM (milling cutters, drills, reamers, saw blades)
Rotating cutting tools
Tools from all manufacturers
Special tools according to drawing
